

All consolidated companies

Our Corporate Responsibility Report 2009 is an online document that went live on 2 November 2009, accompanied by a fast facts printed brochure. Similar to 2008, the report covers all consolidated companies in which Linde has at least a 50 percent stake.

Reporting across entire organisational structure

Once again this year, we report according to divisions as there are considerable differences between our main Gases and Engineering Divisions and our logistics business, Gist. See our regular Corporate Responsibility link at www.linde.com for details on our CR activities at Gist and an overview of activities and initiatives of a regional nature.

Our CR guidelines

This CR Report follows current, internationally recognised recommendations by the Global Reporting Initiative (GRI). Both this report and our "Corporate Responsibility 2009. At A Glance." brochure are available in English and German. The copy deadline was 30 June 2009. The report also includes the annual Communication on Progress (COP) report under the UN Global Compact. The Linde Group plans to continue publishing regular sustainability reports. The publication date for the next report will be announced in good time on our website.
